

## Measuring Tips

Email; [diy@harmonykitchens.com.au](mailto:diy@harmonykitchens.com.au)

Here are some measuring tips to get you started on designing your own kitchen

- 1 Draw a rough plan sketch of your kitchen area.
- 2 Measure (in metric) your kitchen area:
  - Begin in one corner and measure along the wall at bench height (approx 900mm from floor).
  - Measure width of windows and doors (note any windows that are lower than bench height).
  - Continue to measure around the room/area as above.
- 3 Measure the distance of your sink plumbing to the nearest wall.
- 4 Mark the positions of all electric and/or gas points.
- 5 Transfer your sketch to our Kitchen Layout Grid and email to [diy@harmonykitchens.com.au](mailto:diy@harmonykitchens.com.au)
